SUPPLEMENTARY INFORMATION:**History**

On January 2, 1997, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by modifying Class E airspace at Fort Stewart, GA (62 FR 70). This action would provide adequate Class E airspace for IFR operations at Wright AAF.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Designations for Class E airspace extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9D dated September 4, 1996, and effective September 16, 1996. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR part 71) modifies Class E airspace at Fort Stewart, GA. A GPS RWY 32R SIAP has been developed for Wright AAF. Additional controlled airspace extending upward from 700 feet above the surface (AGL) is needed to accommodate this SIAP.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally

current. It, therefore, (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
